INDEX TO VOLUME XXI.

A.

Achromatic systems determined by spectral bands, *Brace*, 289.

Air, ions in, rate of recombination of, *Hendren*, 314.

Alloys, Hensler, irreversibility of, *Hill*, 335.

Alternating condenser field, radiation from, *Sanford*, 343.

Amalgams, purification of, *Hulett and Minchin*, 388.

Ames, J. S., Webster's *Dynamics*, 198.

Anode, absorption of hydrogen by, *Skinner*, 1, 169.

Anomalous dispersion determined by spectral bands, *Brace*, 289.

Arc, carbon, residual E.M.F. of, *Becknell*, 181.

Austin, L. W., Specific heat of gases at high temperatures, 209.

B.

Barus, C., Fleeting and persistent nuclei in energized dust-free air, 52.

Becknell, G. G., Residual E.M.F. of the carbon arc, 181.

Bevier, L., Vowel A, O, U, 80.

Blake, F. C., The transmission and reflection of electric waves by screens of resonators and grids, 409.

Boiling point of current-bearing matter, *Heyl*, 189.

Book reviews:

Becquerel rays, *Strutt*, 201.

Dynamics, *Webster*, 198.

Maxwell's theory and wireless telegraphy, *Poincare; Vreeland*, 350.

Physical phenomena, *Righi*, 205.

Physical science, *Whetham*, 206.

Radioactivity, *Rutherford*, 201.

Radioactivity, *Soddy*, 201.

Radioactiven Substanzen, *Curie*, 201.

Radium, *Danne*, 201.

Spectroscopie, Band III., *Kayser*, 204.

Brace, D. B., Use of spectral bands in determining anomalous dispersion and achromatic systems, 289.

C.

Capacity, measurement of differential ballistic galvanometer, *Raymond*, 90.

Capacity, variation with temperature, *Terry*, 193.

Carbon dioxide, infra-red spectrum of, *Drew*, 122.

Carbon dioxide, Joule-Thomson effect in, *Kester*, 260.

Carman, A. P., Resistance of tubes to collapse, 381.

Cathode, evolution of hydrogen from, *Skinner*, 1, 169.

Cells, standard, polarization of, *Ramsey*, 56.

Chamberlain, C. W., Radius of molecular attraction, 63.

Child, C. D., The conductivity of the vapor from a mercury arc, 413.

Current, measurement of by quadrant electrometer, *Stewart*, 58, 229.

D.

Displacement, electric, magnetic effect of, *Whitehead*, 111.

Dissolved ice hypothesis, *Hudson*, 16.

Distillation of amalgams, *Hulett and Minchin*, 388.

Drew, E. R., Infra-red spectrum of carbon dioxide and nitrogen, 122.

E.

Electric Waves, transmission and reflection of, by screens of resonators and grids, *Blake and Fountain*, 409.

Electrodeless discharge, duration of the afterglow produced by, *Trowbridge*, 410.

Electrometer, quadrant, measurement of current by, *Stewart*, 58, 229.

INDEX TO VOLUME XXI.

A.

Achromatic systems determined by spectral bands, *Brace*, 289.

Air, ions in, rate of recombination of, *Hendren*, 314.

Alloys, Hensler, irreversibility of, *Hill*, 335.

Alternating condenser field, radiation from, *Sanford*, 343.

Amalgams, purification of, *Hulett and Minchin*, 388.

D.

Displacement, electric, magnetic effect of, *Whitehead*, 111.

Dissolved ice hypothesis, *Hudson*, 16.

Distillation of amalgams, *Hulett and Minchin*, 388.

Drew, E. R., Infra-red spectrum of carbon dioxide and nitrogen, 122.

E.

Electric Waves, transmission and reflection of, by screens of resonators and grids, *Blake and Fountain*, 409.

Electrodeless discharge, duration of the afterglow produced by, *Trowbridge*, 410.

Electrometer, quadrant, measurement of current by, *Stewart*, 58, 229.

Electromotive force, residual, of the carbon arc, *Becknell*, 181.

F.

Films, platinum, color in, *Stone*, 27.
Flame gases, ionization in, *Tufts*, 409.
Flames, ionization in gases from colored, *Lewis*, 353.
Fountain, C. R., The transmission and reflection of electric waves by screens of resonators and grids, 409.

G.

Galvanometer, differential ballistic, measurement of inductance and capacity by, *Raymond*, 90.
Gases, specific heat of, *Holborn and Austin*, 205.
Goodwin, H. M., Determining absolute potential differences, 129.

H.

Hall, E. E., Total reflection, 346.
Hendren, L. L., Rate of recombination of ions in air, 314.
Herdegen, R. T., Comparison of mutual inductance with self inductance, 63.
Heyl, P. R., Properties of current bearing matter, 189.
Hill, B. V., Irreversibility of Hensler alloys, 335.
Holborn, L., Specific heat of gases at high temperatures, 209.
Hudson, C. S., Application of hypothesis of dissolved ice to the freezing of water and of dilute solutions, 16.
Hulett, Geo. A., The distillation of amalgams, and the purification of mercury, 388.
Hydrogen, evolution of from cathode and absorption by anode, *Skinner*, 1, 169.

I.

Inductance, measurement of differential ballistic galvanometer, *Raymond*, 90.
mutual comparison, with self inductance, *Herdegen*, 63.
Ionization in flame gases and vapors, *Tufts*, 409.
Ionization in gases from colored flames, *Lewis*, 353.
Ions in air, rate of combination, *Hendren*, 314.
Irreversibility of Hensler alloys, 335.

J.

Joule-Thomson effect in CO_2, *Kester*, 260.

K.

Kester, F. E., Joule-Thomson effect in carbon dioxide, 260.

L.

Lewis P., Ionization in gases from colored flames, 353.
Luminescence of Sidot-blende, *Nichols and Merritt*, 247.

M.

Magnetic effect of electric displacement, *Whitehead*, 111.
Magnetic rotation in sodium vapor, *Wood and Springsteen*, 41.
Mercury, purification of, *Hulett and Minchen*, 388.
Mercury arc, conductivity of the vapor from, *Child*, 413.
Merritt, E., Luminescence of Sidot-blende, 247.
Decay of phosphorescence, 411.
Curie's *Radioactiven Substanzen*, 201.
Danne's *Radium*, 201.
Poincare and Vreeland's *Maxwell's Theory* and *Wireless Telegraphy*, 350.
Righi's *Physical Phenomena*, 205.
Rutherford's *Radioactivity*, 201.
Soddy's *Radioactivity*, 201.
Strutt's *Becquerel Rays*, 201.
Whetham's *Physical Science*, 206.
Minchin, Howard D., The distillation of amalgams and the purification of mercury, 388.
Molecular attraction, radius of, *Chamberlain*, 63.

N.

Nichols, E. L., Distribution of energy in the visible spectrum, 147.
Luminescence of Sidot-blende, 247.
Decay of phosphorescence, 411.

Nichols, E. L., Kayser's *Spectroscopie*, 204.
Nitrogen, infra-red spectrum of, *Drew*, 122.
Nuclei in energized dust-free air, *Barus*, 52.

O.

Oscillograph, use of a magnetic field with the Ryan kathode ray, *Rankin*, 399.

P.

Palmer, A. de F., Thermo-electric determination of temperature, 65.
Pendulum, conical, range of adjustment, *Slate*, 166.
Phosphorescence, the decay of, *Nichols and Merritt*, 411.
Physical Society, abstracts, 52, 407.
Pierce, Geo. W., Experiments on resonance in wireless telegraph circuits, Part III., 367.
Polarization of standard cells, *Ramsey*, 56.
Potential differences, absolute, by Billitzer's method, *Goodwin and Sosman*, 129.

Q.

Quartz prism, optical rotation by, *Reese*, 56.

R.

Radiation, wave-length of, from an alternating condenser field, *Sanford*, 343.
Ramsey, R. R., Polarization of standard cells, 56.
Rankin, R., Use of a magnetic field with the Ryan kathode ray oscillograph, 399.
Raymond, W. J., Measurement of inductance and capacity, 90.
Reese, H. M., Optical rotation by a quartz prism, 56.
Reflection, total, *Hall*, 346.
Resonance in wireless telegraph circuits, *Pierce*, 367.
Ryan kathode ray oscillograph, use of a magnetic field with, *Rankin*, 399.

S.

Sanford, F., Wave-length of radiation given off from alternating condenser field, 343.
Sidot-blende, luminescence of, *Nichols and Merritt*, 247
Skinner, C. A., Evolution of hydrogen from the cathode and its absorption by the anode in gases, 1, 169.
Slate, F., Range of adjustment for the conical pendulum, 166.
Sodium vapor, magnetic rotation in, *Wood and Springsteen*, 41.
Sosman, R. B., Absolute potential differences, 129.
Specific heat of gases at high temperatures, *Holborn and Austin*, 209.
Spectral bands, use in determining anomalous dispersion, *Brace*, 289.
Spectrum, infra-red, of CO_2 and nitrogen, *Drew*, 122.
Spectrum, visible, distribution of energy in, *Nichols*, 147.
Springsteen, H. W., magnetic rotation in sodium vapor, 41.
Stewart, O. M., measurement of current by quadrant electrometer, 58, 229.
Stone, I., Color in platinum films, 27.
Surface tension by liquid jets, *Watson*, 59.

T.

Thermo-electric determination of temperature, *Palmer*, 65.
Temperature, thermo-electric determination of, *Palmer*, 65.
Terry, E. M., Variation of capacity with temperature, 193.
Tubes, resistance of to collapse, *Carman*, 381.
Tufts, F. L., Ionization in flame gases and vapors, 409.
Trowbridge, C. C., The duration of the afterglow produced by the electrodeless discharge, 410.

V.

Vowel A, O, U, *Bevier*, 80.

W.

Watson, F. R., Surface tension by method of liquid jets, 59.
Whitehead, J. B., Magnetic effect of electric displacement, 111.
Wireless telegraph circuit, resonance in, *Pierce*, 367.
Wood, R. W., Magnetic rotation in sodium vapor, 41.
